## Regulatory & Compliance Statement

TO: Uniban

RE: Kraft and white top linerboard, manufactured at Monticello, MS, and Brewton, AL

---

### **Regulation (EU) 2025/40, Packaging and Packaging Waste Regulation (PPWR), repealing Directive 94/62/EC**

In regard to this framework regulation, lead, cadmium, mercury, and hexavalent chromium are not intentionally added to the kraft or white top linerboard.

Please be advised that it is the responsibility of the finished article producer to ensure that their product meets all mandates within scope of the PPWR.

### **Heavy Metals (The Toxics in Packaging Clearinghouse [TPCH] - The Coalition of Northeastern Governors [CONEG])**

Georgia-Pacific certifies that the products supplied to you meet the requirements of the above Model Legislation limiting the presence of heavy metals, specifically lead, mercury, cadmium, and hexavalent chromium. In accordance with these requirements, we do not intentionally add any of the regulated heavy metals during the manufacturing of our products. Additionally, the sum of the incidental concentration levels of these metals in the kraft and white top linerboard does not exceed 100 ppm by weight.

Signed,

Donna Sattler McRae  
Director, Product Safety & Regulatory Compliance
